

PRINTEC® 134 MAX

New special top surface blanket to optimize printing quality specifically designed for hi-quality sheet-fed printing. Increased compressibility leading to longer life and great smash resistance. High chemical resistance face compound and UV compatible. Normal and hybrid inks. It's an all purpose, versatile blanket.

Application

- Commercial Sheet-Fed and Packaging

Features

- Excellent ink carrying capacity
- Special chemical top compound
- Defect-free surface
- Uniform gauge assures excellent printing consistency

Benefits

- Improved ink release surface optimizes ink transfer providing sharp and rounder dot
- Good coverage of substrates
- Reduced pilling
- User-friendly and easy to clean

Durability

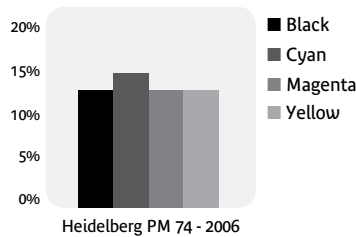

- High tensile backing to prevent stretching
- Reduced embossing and swelling
- Resists smashes and sinking

PHYSICAL CHARACTERISTICS

- Color: Dark Blue
- Thickness: 3 Plies - 1.96 mm
- Roughness: 1.0 µRA
- Hardness: 78 Shore A
- Stretch: 2 % Max
- Compressibility: 125 +/- 25 N/cm²
- Surface: Buffed

Dot Gain Curve (50%)

Heidelberg PM 74 - 2006
